Products

1. ExcpTax

by Excellent Protection Co, a leader in digital transformation solutions, simplifies your journey to ZATCA-compliant e-invoicing.

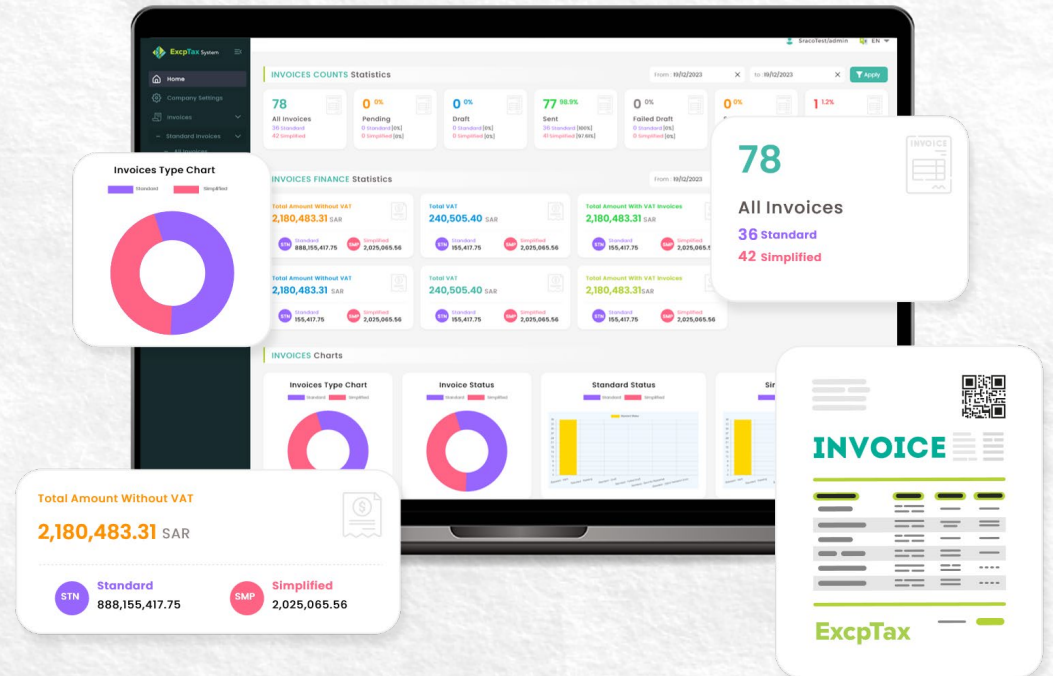

No Need to change your current financial and accounting System:

- Seamless integration with your existing ERP system (SAP, Oracle, MS Dynamics, etc.).
- No need to replace your accounting software or disrupt your current workflow.

Swift Implementation, Powerful Results:

- Up and running in just one day with our user-friendly setup process.
- 100% automation eliminates manual data entry and ensures compliance.
- Receive instant error notifications, keeping you informed.

Products

1. ExcpTax

by Excellent Protection Co, a leader in digital transformation solutions, simplifies your journey to ZATCA-compliant e-invoicing.

Built for Scalability and Flexibility:

- Manage multiple business units and branches from a single platform at no extra cost.
- Handle any volume of invoices and transactions without limitations.
- No extra charges or hidden fees

Unmatched Reliability and Security:

- Enjoy complete peace of mind with a fully secure, cloud-based solution.
- Guaranteed compliance with all ZATCA e-invoicing requirements.

Who Needs ExcpTax?

- Businesses seeking a smooth transition to ZATCA e-invoicing without replacing its current systems.
- Companies of all sizes and industries (B2B & B2C).

Products

2. EXCP Business Portal

The Business portal Platform provides the information needed by the senior management of each enterprise in general or in detail if required. It also enables them to follow the details of each project separately through one platform easily and quickly. For example, the Business Sector Platform in recruitment companies enables them to manage their workers and follow up: - Employment contracts - Salaries - Account statement - Vacation credits - Support tickets

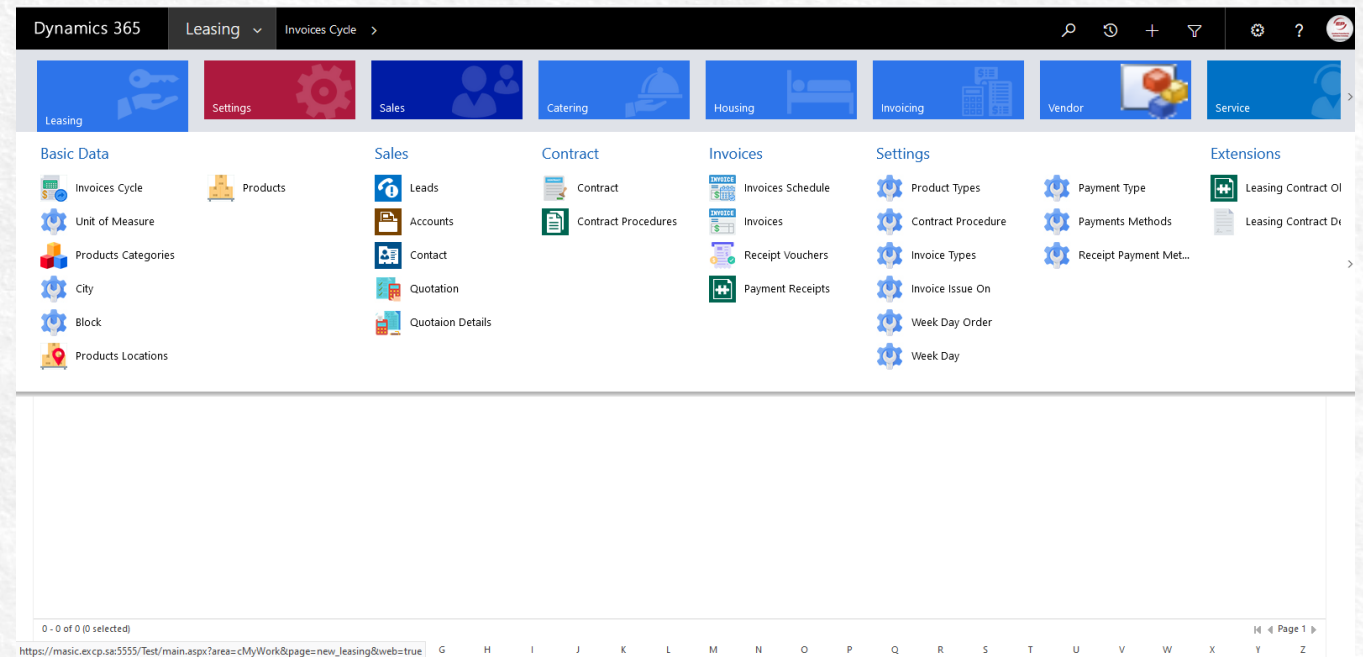

3. EXCP Ticketing System

The ticketing system automates the work cycle between the contact center of any organization and customers, enabling them to: - Recording customer calls - Registration of the date of receipt of the problem and inquiries from customers - Register all complaints and inquiries and send them to the relevant departments for follow-up Enabling them to respond and communicate with customers in a fast and orderly manner, increasing the efficiency of the work

Products

4. EXCP Leasing Management System

- Tenants' and officials' data
- City, location and real estate data
- Quotations
- Reports and statements of accounts
- Contracts
- Contract procedures (renewal, termination, grace period, reduction of amounts...)
- Invoices and collections

Products

5. EXCP Sales System

The sales management system helps you automate your sales process and manage your sales staff easily and accurately, increasing the efficiency of your organization's production process. It enables you to: - Create your visits dates and follow your customers - Check your employees' daily sales ratios - Periodic and orderly issuance of sales reports

7. EXCP Catering System

The system assists recruitment or hospitality companies in managing their day-to-day operations such as meal processing in large numbers and organizing their distribution in an orderly, easy and fast manner

6. EXCP Booking System

The booking system facilitates and regulates the booking process for customers, reducing the error rate such as booking a service such as in HR management companies, booking clinic appointments, hotels and other many projects that need to organize a booking process

8. EXCP Delivery Application

The delivery application from Excellent Protection company is characterized by containing many distinctive features such as ease of registration and use of the application, ease of identifying trips, the ability to track the driver, the diversity of payment methods and evaluating the driver after the end of the trip, as it has been designed in a distinctive style that provides an enjoyable experience for the user
